

Introduction to YOKOMO

2022 October 18th
Yokomo Ltd.

What is YOKOMO?

Established in 1973, YOKOMO is a manufacturer and wholesaler of RC car models, as well as an operator of RC car driving ranges and a RC car rental business. In 1991, YOKOMO relocated our head office from Adachi-ku, Tokyo to Tsukuba City, Ibaraki Prefecture, and are working to popularize RC cars and revitalize the RC car market as an integrated RC car facility (Tsukuba RC Park) with a full-scale RC car driving range.

We would like to introduce our products to as many people as possible, so we are sending our product introduction materials to dealers who have not yet done business with us.

We would appreciate it if you could take a look at this product introduction material and consider handling our products.

If you have any questions or concerns, please feel free to contact us.

Thank you.

Yokomo Ltd.

YOKOMO's Category/DRIFT

Ever since YOKOMO released the first drift RC car as one of the RC car categories in 2004, YOKOMO has been the top brand in the drifting category and has gained the utmost trust of RC lovers worldwide.

When it comes to 1/10 scale 2WD drift RC car, YOKOMO is the perfect brand you can start with!

DRIFT

— The charm of drift cars —

DRIFT CAR

— The charm of drift cars —

You can easily enjoy drift driving through corners with a power slide, and powerful driving even with a radio-controlled car. It is a rear-drive drift car just like the actual car, and is equipped with a gyro system that assists steering. Countersteering unique to drifting enhances the sense of stability.

2

YOKOMO's Category/SPEED

Designed for competition, YOKOMO's BD11 in the speed category has proven its performance with a runner-up finish at the most recent World Championships in Italy.

The new model is easy to understand and enjoyable to run, even for beginners.

A dynamic, blurred photograph of the YOKOMO BD11 speed car in motion, creating a sense of speed and agility. Overlaid on the right side of the image is large, bold text that reads "SPEED CAR" and "speed car charm" in a stylized font. The background is a dark, textured surface, likely a racing track, which provides a strong contrast to the bright white and blue of the car.

SPEED CAR
= speed car charm =

Manipulate the machine as you wish and clear the corner. It is possible to trace the driving line envisioned by the driver with the delicate control performance that can be achieved because it is a precise hobby radio control.

YOKOMO's Category/OFF-ROAD

YOKOMO's competition off-road cars have produced world champions seven times in the past, and continue to evolve by receiving feedback from their experience in the world's most prestigious competitions.

The new model is designed so that even beginners can easily enjoy running!

A collage of images showcasing YOKOMO off-road buggies. One image shows a yellow buggy in motion on a dirt track. Another image shows a buggy performing a high jump, with its body angled upwards. A third image is a close-up of the front-left corner of a buggy, similar to the one in the first image but from a different angle. The background of the collage features a grid pattern.

OFF-ROAD CAR
= The form of off-road cars =

An off-road car that can handle rough roads and jumps. With a racing buggy, you can clear corners exhilaratingly. Speed up and jump higher! Feel the real thrill of dynamic off-road by landing supplely with high-performance suspension!

Classification Master/Super/Rookie

Top-of-the-line models in each category. The ultimate RC cars designed to deliver the best driving performance for each circuit. Made of high-precision aluminum parts and lightweight, high-rigidity carbon parts, this class is nothing but gems of products with attention to detail in the weight balance and movement of each part. More than half a century of know-how poured into without reserve, drivers' will to operate can be faithfully reproduced.

High-spec machines ideal for users who mainly consider driving RC cars on dedicated circuits. Further enhanced by adding high quality optional parts to base machines and tuned for high speed driving, this class enables a higher level driving. Regardless of experience, this class would be a good choice for those who are planning to drive at a circuits.

Ideal introductory RC cars for those who are trying RC cars for the first time. Many are pre-assembled, and the equipment that requires specialized knowledge is pre-adjusted and pre-installed, only you need is a battery to get the car running right away. Body-painting is more time-consuming than you might think, but a pre-painted models are truly Ready-To-Run!

Master DRIFT

Master Drift MD1.0

MDR-010/¥99,000

Description

Advanced and novel, Yokomo's best performance is born here! The new RWD drift car "MD 1.0", which has the title of master drift, is a full-spec machine that incorporates functions and structures for drifting. From the drivetrain to the suspension, it's the ultimate style to wow any competitor.

Details

- RWD Gear Drive Drift Car
- 2.4mm Thick Lightweight Graphite Chassis
- Vertical Mount Graphite Upper Deck
- Suspension Type Graphite Suspension Arm
- 3-Gear/4-Gear Compatible Aluminum Rear Bulkhead
- Differential Height Adjust
- New Ultra-Lightweight Slide Rack steering system
- Graphite rear ESC mount
- Adjustable motor position
- Front and rear aluminum shock towers
- Big bore aluminum low friction shocks
- Lightweight graphite battery holder

Super DRIFT

Super Drift SD1.0

SDR-010/¥62,000

The image shows the Super Drift SD1.0 RWD drift car assembly kit. It features a detailed view of the car's underside, highlighting the aluminum chassis, shock towers, and suspension components. The car is black with silver and red accents. In the top left corner, there is a large 'SD 1.0' logo. In the bottom right corner, there is a 'Super Drift' logo. The model name 'SDR-010' and price '62,000 JPY' are displayed at the bottom right.

SD 1.0

**Full-scale tuning machine
based on aluminum chassis**

Super Drift SD1.0
SDR-010 62,000 JPY

Description

Customizing a car is one of the great pleasures of RC cars. Especially for drift cars, in addition to setting and tuning parts, there are many dress-up parts available, and depending on the combination, it is possible to create "the world's only original machine". Of course, the SD1.0 can also be used for a wide range of driving performance, and it is attractive for its wide range of adjustability to any road conditions and any driving style.

Details

- RWD Drift Car Assembly Kit
- Two types of gearboxes (3-gear/4-gear) included
- Aluminum SLF big bore shocks
- Drift-specific springs
- Lightweight slide rack steering system
- Aluminum shock towers (front and rear)
- Integrated aluminum front axle
- Aluminum rear hub carrier
- Compatible with both standard and short Li-Po batteries

Rookie DRIFT

Drift Package 2WD GR Supra Body RTR Full Set

DP-YD2RTRR(Red)/¥43,800

DP-YD2RTRW(White)/¥43,800

Description

This is a full set of RWD drift cars that we would like to recommend to those who are buying a RC car for the first time, and those who are trying drift RC for the first time. It is a complete set that covers everything that beginners tend to stumble on, such as chassis assembly, RC device installation, and body painting. Based on the latest RWD drift car YD-2Z, more than 90% of the parts are shared, so you can replace parts due to damage, as well as a wide variety of optional parts for upgrading.

Details

- RTR full set that can be driven immediately
- Excellent expandability based on the latest model YD-2Z
- 2.4GHz transceiver
- 27-turn motor for Drifting
- Pre-installed steering gyro for drifting
- 1600mAh Ni-MH battery
- AC quick charger
- Painted PANDEM GR Supra body
- Drift tires and wheels

Master SPEED

Master Speed BD11

MRTC-BD11/¥93,000

RC MODEL CARS
YOKOMO
www.teamyokomo.com

Description

Handling a car with world top performance is difficult? That is a thing of the past! The time has come when we need a competition touring car as a hobby that has the latest specifications and can be both fun and challenging.

Driving performance that has been thoroughly tested in Europe's top races. While boldly refining the suspension and drive system, the development vision was always "usability" that anyone can compete in the race. The supple steering performance brought out by the balance between rigidity and flexibility, and the latest suspension are constructed with a simple setting method to enhance the sense of security that allows the driver to concentrate on control.

Details

- 2 belt-drive 1/10 competition touring car
- Graphite double deck chassis
- Graphite Front and rear suspension arms
- Front separate damper stay
- ATF(Active Top-deck Flex)
- Low mount stabilizer
- RTC(Rear Toe Control) equipped
- New designed front double joint universal
- New designed shock shaft guide

Rookie SPEED

1/12 Scale Car Rookie Speed GT1 Chassis Kit

GT1-01/¥29,800

Description

A direct drive machine that allows you to enjoy the fun of the speed category to the fullest. Yokomo's GT machine, which runs through corners with sharp throttle response, is back on the circuit!

A speed car with the low form of a GT machine that exhibits high dynamic performance. Equipped with a realistic body shape, semi-slick tread radial tires, and a relatively simple chassis configuration, it is the perfect package for enjoying racing. Of course, it is also possible to bring out your favorite driving characteristics by changing the front suspension settings and wheelbase. We are planning to hold race events in various places, so it is a racing car that you can feel like a factory team, from setting to driving and participating in the race.

Details

- Rear 2WD direct drive
- GT car body included
- All-round radial pattern rubber tires included
- Short size Li-po battery only
- Kingpin & coil spring front suspension
- Overall length: 408mm
- Overall width: 180mm
- Overall height: 95mm
- Wheelbase: 234mm (239mm selectable)
- Total equipment weight: 920g

Rookie SPEED

1/12 Scale Car Rookie Speed GT1 Chassis RTR
GT1-01RTR/¥45,500

Description

This pre-assembled set allows you to immediately enjoy the performance of GT1 machine. The chassis is pre-assembled, and the 2.4GHz transmitter/receiver, steering servo, speed controller and motor are pre-installed. The body is also pre-painted and pre-cut, so the only you need to do is to prepare a battery!

Details

- 1/12 scale direct drive GT car, complete set
- 2.4GHz transmitter/receiver system
- Speed controller for brush motor
- SS58 brush motor
- FRP main chassis & front chassis
- Front king pin & coil spring suspension
- Aluminum motor mount and rear bulkhead
- 4-pinion gear differential
- New compound radial rubber tires included
- Type-A painted body included
- Short Li-po battery only (sold separately)

Master OFF-ROAD

Master Off-road MO1.0

MO-010/¥93,800

Description

High-end racing buggy with shaft-driven 4WD that kicks hard on the road. Fine-tuned from suspension to drivetrain, this buggy is ready to compete in world-class races. The center drive also features a center differential for high-grip surfaces and a slipper clutch for low-grip surfaces, allowing you to choose according to the road conditions.

Details

- Shaft drive 4WD racing buggy
- Aluminum lightweight bulkhead
- Aluminum lightweight motor mount
- Lightweight slipper unit & center differential included
- High durability Φ 3.5mm inner suspension
- Bush-type upper arm pivot (inside)
- Adjustable battery position
- Aluminum rear hub with adjustable roll center bushing inserts
- Dirt and carpet springs and stabilizer included
- Aluminum servo mount
- Aluminum cooling fan mount
- Aluminum shock cap balls

Super OFF-ROAD

Super Off-road SO1.0

SO-010/¥64,800

Description

2WD buggy which is one of the most popular off-road cars for competition use. The kit includes all parts suitable for both dirt and carpet surfaces, allowing the buggy to be used on any type of surface. The wide range of variations is the charm of this model. Since this buggy is based on the world championship-winning machine, the performance of the kit is also well documented.

Details

- 1/10 competition 2WD off-road car
- Aluminum main chassis
- Gear-down sealed transmissions
- Aluminum front upper arm mount
- Aluminum steering bell crank
- Aluminum rear hub carrier
- Titanium turnbuckle
- Separate mechanical tray
- 3mm titanium coated shock shaft
- X-ring big bore oil damper
- Dirt/carpet springs
- LC/LD gear box
- Gear differential/ball differential included

Electronics

YZ-114 PLUS AC/DC Rapid Charger/Discharger

YZ-114PLUSNA ¥12,400

Main specifications

Input voltage: 100 to 240 VAC or 11 to 18 VDC
Charging current: 0.1 to 6.0A
Maximum charging current: 4.35V/cell
Discharge current: 0.1 to 5.0A
Supported batteries: Li-Po/Li-fe/Liion/Li-HV, 1 to 6 cells Ni-MH/Ni-cd, 1 to 15 cells
Output port: Charging (banana plug type), USB 5.0V/2.1A
Charge mode: Li-Po/Li-fe/Li-ion/Li-HV [Charge, Balance Charge, Discharge, Fast Charge, Storage] Ni-MH/Ni-cd [Charge, Auto Charge, Cycle, Re-peak, Discharge]
Safety features: Automatic charge current limitation, Battery voltage monitoring, Capacity limitation, Temperature limitation, Charge time limitation
